Meeting notes

- add about studio page and link to main studio site
    - where the studio is based
    - head people/founders
    - when it was founded
- alter some of the colors for the different pages (overall darker or dingier for more contrast/relation to the film)
    - missing link a dark turquoise
    - kubo a dark foresty green or a really warm brown/dark orange
    - cool darker brown for box trolls (like a raw umber almost)
- more images per each section
    - can be formatted more organically as well
- maybe add links for where to watch (not super necessary
- add cast/crew using a paragraph format with each name separated by a dot or something similar (separate out cast and crew also?)
- embed trailers for movies
- separate out navigation bar
    - could be done with a low opacity black or something similar
- take out "plot" from each page and just have the paragraph under the name of the movie
- style movie titles on each page to reflect the movie more
- maybe include the release year for each movie next to its name
