Project Title: Laika Studios

I'd like this site to be built with the typical web format of a landing page, and several other pages for each movie they've made plus one for background on the studio.

- **Home Page-** I think this page should function more as a landing page that prompts the viewer to explore different tabs. This page could just be a set of buttons and a header with a nice background that gives the viewer an impression of the site to come.

- **Coraline**

- **ParaNorman**

- **The Box Trolls**

- **Kubo and the Two Strings**

- **Missing Link**

- **About/Sources-** This page will include the about section, including their upcoming movie, as well as being a spot for the sources to exist
